Professional Summary

CSE undergraduate with **2 government internships**, a published research paper (NCMPCS-2026), and **PoliceOSINT v1.0** deployed at Gurugram Police – a distributed OSINT platform (Next.js, FastAPI, Celery, Redis, Groq/LLaMA 3.3 70b). Solved **260 LeetCode problems** (48 Hard, 91.81% acceptance). I architect, test, and ship systems that work in the real world. Graduating May 2027.

Technical Skills

Languages	Python, C++, TypeScript, Bash, C
Frameworks	FastAPI, Next.js 14, React, SQLAlchemy, ReportLab
Distributed Systems	Celery, Redis, Docker, Nginx, Async Task Queues, Concurrent Pipelines
Databases	PostgreSQL, Redis
AI / ML	Groq, Llama 3.3 70b, Random Forest, SVM, Gradient Boosting, scikit-learn
Security & OSINT	Blockchain Tracing, GeoIP, IPDR Analysis, SHA-256, Etherscan API, TronScan API
Developer Tools	Git, Linux, Docker, GitHub Actions, Jupyter Notebook

Work Experience

Software Engineering Intern June 2026
Gurugram Police Cyber Security Summer Internship (GPCSSI), 13th Batch – Gurugram, Haryana *4 Weeks*

- Architected and shipped **PoliceOSINT v1.0** end-to-end as sole engineer; achieved **55/55 unit tests passing** and reduced manual evidence triage by **70%**
- Designed system architecture across **Next.js, FastAPI, PostgreSQL, Redis, Celery, Docker, and Nginx**; deployed behind Nginx reverse-proxy with full containerization
- Integrated **Groq/Llama 3.3 70b** AI copilot for automated FIR drafting and IPC/IT Act section mapping; self-taught LLM APIs and applied within sprint
- Built **IPDR Analyzer** processing **1,000+ IPs at sub-second latency** with batch GeoIP enrichment; validated requirements with law enforcement officers

Cyber Crime Intern Jan 2026 – Feb 2026
Uttar Pradesh Police, Cyber Crime Department – Lucknow, UP *5 Weeks*

- Analyzed **50+ real-world fraud cases** (phishing, UPI scams, investment fraud); mapped multi-hop fraud chains to expose race conditions in distributed payment systems
- Built **Python automation scripts** reducing manual triage time by **30%**; presented findings clearly to senior officers with non-technical backgrounds

Projects

PoliceOSINT v1.0 • *Next.js 14, FastAPI, Celery, Redis, PostgreSQL, Docker, Groq/Llama 3.3 70b, Nginx* 2026

- **System Design:** Microservices platform with **10+ modules** (Identity, IP, Domain, UPI, Crypto, GEOINT, Social Media, Dark Web, Media Forensics) for horizontal scalability and module-level fault isolation
- **Concurrency & Reliability:** Celery/Redis async task queues across **50+ sources**; fault-tolerant retries, worker health checks, and graceful degradation under partial failures
- **Performance, Security & AI:** IPDR Analyzer processes **1,000+ IPs at sub-second latency**; SHA-256 chain-of-custody logging; Groq/Llama 3.3 70b for FIR generation and court-ready PDF reports

Research & Publications

AI-Driven Fraud Detection Using Machine Learning Models • *NCMPCS-2026, DSMNRU* March 2026

- Benchmarked Random Forest, SVM, Logistic Regression, Gradient Boosting; achieved **85%+ accuracy** on fraudulent UPI transaction detection; engineered behavioral and transactional feature sets from raw payment data
- Proposed scalable low-latency serving architecture; presented at **National Conference on Machine Learning and Predictive Analytics (NCMPCS-2026)**, DSMNRU

Education

Dr. Shakuntala Mishra National Rehabilitation University Lucknow, India
B.Tech in Computer Science and Engineering *Graduating May 2027*
Coursework: Data Structures & Algorithms, Operating Systems, Computer Networks, DBMS, Distributed Systems, Cyber Security

Certifications & Achievements

- **GPCSSI 13th Batch 2026:** Gurugram Police Cyber Security Summer Internship – competitively selected; PoliceOSINT v1.0 deployed in active law enforcement operations
- **LeetCode:** 260 problems solved (68 Easy, 144 Medium, 48 Hard) | 91.81% acceptance rate | Beats 72.07% globally
- **Languages:** English (Fluent), Hindi (Native) | **Availability:** Summer 2027 internships, May/June start
